

Maths Ideas and Targets!

The targets below are maths targets that the children will cover across the year.

Websites to help-

<https://www.ictgames.com/saveTheWhale/index.html#>

<https://www.ictgames.com/mobilePage/tenFrame/index.html>

<https://www.topmarks.co.uk/maths-games/hit-the-button-> Hit the Button is a very useful website to practise all number skills.

Games to play-

Number bond tennis- Tell the children a number that they are going to make a number for example 9. Bat the children number 5 using your hands what number will they have to bat back?

Matching numbers- Writing a variety of numbers on cut out pieces of paper. Turn the numbers face down. Choose a number and then aim to find the number that you add to it to make the number you are making.

Tens frame- create a table with ten boxes. Add 4 counters to the ten boxes (for example) how many counters are empty? What number sentence can you write?

Maths head- The child to have the number on their head. The adult to give number sentences that could make the number. For example, $3+5$, the number must be 8.
